The screenshot shows a Windows-style application window titled "7 Quick Fix 2.0". The main content area is titled "Errors and Crashes" and contains a grid of buttons for various error types. The "Error on Launching Explorer" button is highlighted in yellow. Below the grid is a taskbar with several icons, including a red 'X' icon. At the bottom of the window, there is a text box with the following content:

When you click the Windows Explorer shortcut which is Pinned to the Taskbar, or when running explorer.exe directly in Windows 7, the following error message may be displayed with text "explorer.exe" in the title bar:
"This file does not have a program associated with it for performing this action. Please install a program or, if one is already installed, create an association in the Default Programs control panel"
And using the WinKey + E key sequence causes "Unspecified error"
However, Windows Explorer may launch correctly when including additional switches such as /e or /n with explorer.exe, or double-click the (My) Computer icon.
Click here to fix this error
